DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-12, drawn to copy protection, classified in class 705, subclass 57.
- II. Claims 13 and 14, drawn to product registration, classified in class 700, subclass 115.
- III. Claims 15-23, drawn to computer communication using cryptography, classified in class 713, subclass 150.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I-IV are related subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as digital rights management. Invention II has separate utility such as product tracking. While invention III has separate utility such as preventing unauthorized access to private communications- See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
